Objectives:

Industrial visits for college students serve several objectives, which are aimed at enhancing their learning experience and preparing them for the practical aspects of their chosen field. Here are some key objectives:

1. **Exposure to Industry Practices**: Students get an opportunity to witness firsthand how theoretical concepts learned in classrooms are applied in real-world industrial settings. This helps in bridging the gap between theory and practice.

2. **Understanding Operations**: They can observe the day-to-day operations of industries, including production processes, quality control measures, and logistics management. This insight provides a comprehensive understanding of industry workflows.

3. **Technology Awareness**: Students can familiarize themselves with the latest technologies and machinery used in industries. This exposure helps them stay updated with current industry trends and advancements.

4. **Career Guidance**: Industrial visits often include interactions with industry professionals and managers. These interactions provide students with insights into career paths, job roles, and skills required for different positions within the industry.

5. **Networking Opportunities**: Students can build connections with professionals, which can be valuable for future internships, projects, or job opportunities. Networking also helps in gaining different perspectives and insights.

6. **Practical Learning**: By seeing real-world applications of their academic knowledge, students can develop a deeper understanding of concepts and their practical implications. This hands-on experience enhances their problem-solving skills.

Overall, industrial visits play a pivotal role in the holistic development of students, preparing them to be competent professionals in their respective fields.

Overview about Industrial Visit:

Industrial visit was arranged by Department of Information Science and Engineering, Shridevi Institute of Engineering and Technology, Tumkur, to visit Infosys Limited Mysore on 29/06/2024 for the students of 2nd 3rd year.

The journey started from our college campus at 4:30 am which included five faculties and eighty three students. The destiny was Infosys Limited located at outskirts of Mysore city. We reached campus at 9am. After the security check at Gate 2 we were greeted by Mr. Shambu, Senior Project Manager at Infosys Ltd, Mysore. He along with Mr. Krishna Prasad, Mr. Prajwal and Mr. Nanda Kishor, System Engineer took our team for a campus tour before the induction started.

The campus tour was mesmerizing, the greenery, the infrastructure, the food court, the cleanliness and its maintenance; the huge Gate, etc drew our attention. Global education center was the center of attraction, this building consists of seven floors, and it can accommodate 14000 trainees at a time. The library was the best motivational spot. Several socio-economic inspirational contents were explained throughout the campus tour such as rain water harvesting, disciplines to be practiced, safety measures to be followed, plantation of trees, recycle of water, employee care center, guest house, etc.

The students were led to Induction hall, and there they played the videos all about Infosys evolution. The students got a platform to talk about college and also to interact with Infosys Industry people. Then the campus tour continued. The campus stretches for over 360 acres, but after covering few Software Development Blocks, we visited Employee Care Center. Took group snaps near Multiplex and refreshed ourselves.

After induction, students hurriedly walked towards Arena Food Court to have delicious lunch. We observed more than six food courts each with capacity of 1000 members. Mr Prajwal led us till our exit security check and we bid bye to the huge inspiring campus.

We also noticed that our students walked proudly out of the Infosys Campus. We started return journey around 5pm, took a break of high tea in Thimmadas hotel and reached back our college campus at 7:30pm. At the end of the day we had a good experience and learnt many things from the visit.
