## **PROJECTS:**

### 1. **Major Project: EXAM SEATING ARRANGEMENT SYSTEM(Duration : 09/12/2017 to 16/02/2018)**

The exam seating arrangement system is designed to automate the process of assigning seats to students during examinations. This system helps educational institutions efficiently organize and manage seating plans by considering factors such as minimizing cheating opportunities, ensuring fairness, accommodating special needs, and optimizing seating arrangements. By utilizing this system, exam administrators can streamline the logistical aspect of exam management, ultimately leading to smoother and more secure examination processes.

**Tools Used: OS - Windows , Technology-Java and J2EE, Web Technologies- Html,Javascript,CSS  
IDE- My Eclipse, Web server- Tomcat, Database- My SQL**
